# **SECTION 02: HAZARD IDENTIFICATION**

\*\* For medical emergencies contact your local poison control centre \*\*.

Signal Word Hazard Classification	Skin Irritation — Category 2. Skin Sensitizer — Category 1. Acute Toxicity 3. Respiratory Sensitizer — Category 1. STOT SE 3. Specific Target Organ Toxicity — Repeated
Hazard Description	Exposure — Category 1.  H315 Causes skin irritation. H317 May cause an allergic skin reaction. H331 Toxic if inhaled. H334 May cause allergy or asthma symptoms or breathing difficulties if inhaled. H335 May cause respiratory irritation. H372 Causes damage to the liver and kidneys
Prevention	through prolonged or repeated exposure. P264 Wash thoroughly after handling. P280 Wear protective gloves and eye protection. P260 Do not breathe mist, vapours, or spray. P270 Do not eat drink or smoke while using this product. P272 Contaminated work clothing should not be allowed out of the workplace.
Response	P271 Use only outdoors or in a well ventilated area. P284 In case of inadequate ventilation wear respiratory protection.  P302 + P352 - If on skin: wash with plenty of water. P362 + P364 - Take off contaminated clothing and wash before reuse. P333 + P313 If skin irritation or rash occurs, get medical advice/attention. P304 + P340 - If inhaled remove person to fresh air and keep comfortable
	for breathing. P311 Call a POISON CENTRE or doctor. P342 + P311 If experiencing respiratory symptoms; call poison center or doctor. P321 - For specific treatment see section 4 on this SDS.
Storage	P403 + P233 Store in a well ventilated area. Keep container tightly closed. P405 Store locked up.
Disposal	P501 Dispose all unused, waste or empty containers in accordance with local regulations.

SECTION 03: COMPOSITION / INFORMATION ON INGREDIENTS				
CHEMICAL NAME AND SYNONYMS CAS # WT. %				
Benzene, 1,1'-methylenebis[4-isocyanato- (MDI)	101-68-8	30-40		
Talc	14807-96-6	10-15		
2,4-Diphenylmethane diidocyante (MDI)	5873-54-1	0.5-1		

# PRODUCT: PF7770 PLIOGRIP URETHANE STRUCTURAL ADHESIVE PART A (35 MIN)

### **SECTION 04: FIRST-AID MEASURES**

Eye contact	Check for and remove any contact lenses, if safe and easy to do so. In case of contact,
	immediately flush eyes, keeping eyelids open, with plenty of water for at least 15 minutes.
	Obtain medical attention.
Skin contact	Immediately flush skin with plenty of soap and water. Remove contaminated clothing.
	Wash clothing before reuse. Do not peel solidified product off the skin. If irritation persists,
	seek medical attention.
Inhalation	If inhaled, remove to fresh air. If not breathing, give artificial respiration. If breathing is
	difficult, give oxygen, obtain medical attention.
Ingestion	Rinse mouth with water. Never give anything by mouth to an unconscious person. If
	spontaneous vomiting occurs have victim lean forward with head down to prevent
	aspiration of fluid into the lungs. Obtain medical attention immediately.
Additional information	Treat victims symptomatically. Skin: this compound is a known skin sensitizer. Treat
	symptomatically as for contact dermatitis or thermal burns. If burned, treat as thermal burn.
	Ingestion: treat symptomatically. There is no specific antidote. Inducing vomiting is
	contraindicated because of the irritating nature of this compound. Respiratory: this
	compound is a known pulmonary sensitizer. Treatment is essentially symptomatic. An
	individual having a skin or pulmonary sensitization reaction to this material should be
	removed from exposure to any isocyanate. In the event of an incident involving this product
	ensure that medical authorities are provided a copy of this safety data sheet. In all cases, if
	irritation persists seek medical attention.

# SECTION 05: FIRE-FIGHTING MEASURES

Suitable and unsuitable extinguishing ..... Dry chemical. Carbon dioxide. Water spray. Specific hazards arising from the ..... Aldehydes, carbon dioxide and carbon monoxide, halogenated hydrocarbons, hydrogen

hazardous product, such as the nature of cyanide (hydrocyanic acid), isocyanates, ketones, nitrogen compounds, nitrogen oxides (nox), toxic fumes carbon dioxide and carbon monoxide, hydrogen cyanide (hydrocyanic any hazardous combustion products acid), isocyanates, nitrogen oxides (nox), toxic fumes, aldehydes, ketones, halogenated

hydrocarbons. Special protective equipment and .....

precautions for fire-fighters

Firefighter should be equipped with self-contained breathing apparatus and full protective clothing to protect against potentially toxic and irritating fumes. During a fire, isocyanate vapours and other irritating, highly toxic gases may be generated by thermal decomposition or combustion. Cool fire-exposed containers with cold water spray. Heat will cause pressure buildup and may cause explosive rupture. Heat will cause pressure buildup and may cause explosive rupture.

Unusual fire / explosion hazards.....

Clean up.....

Reaction between water or foam and hot MDI can be vigorous.

#### **SECTION 06: ACCIDENTAL RELEASE MEASURES**

Leak/spill	Isolate area and keep unauthorized people away. Do not walk through spilled material. Wear recommended protective equipment. Ventilate. Open windows and doors to allow air circulation. Dike area to prevent spreading. The use of absorbent socks or spill pillows
	may be required. Stop leak if safe to do so. Prevent runoff into drains, sewers, and other waterways.
Minor spills	Absorb isocyanates with sawdust or other absorbent. Cover spill area with suitable absorbent material (e.g., sand, earth, sawdust, vermiculite, Oil-Dri, Kitty Litter, etc.). Saturate absorbent material with neutralizing solution. Recommended portion is ten parts

neutralizing solution to one part spilled material. Suggested neutralization solution: 90% water + 5% concentrated ammonia + 5% detergent (dish soap). Add an additional layer of absorbent material. Use shovel to move absorbent material around to ensure that all spilled material comes in contact with the neutralizing solution. Shovel all absorbed material, including absorbent socks or spill pillows, into an appropriate salvage drum. Add further amounts of neutralizing solution. Allow to stand (covered loosely) for 48 to 72 hours, to allow any gases to escape. Do not use neutralizing solution on a large spill. Decontaminate spill area with decontamination solution. Area can then be washed with soap and water. Use a heat gun and a scraper to remove cured adhesive. Prior to using a

heat gun, ensure that the surface can withstand the heat generated by the gun. Use a solvent such as; isopropanol, methyl ethyl ketone, or acetone, to clean up up residual curative.

vapour or spray mist. Handle in accordance with good industrial hygiene and safety

# SECTION 07: HANDLING AND STORAGE

Precautions for safe handling...... Avoid skin and eye contact. Do not breathe vapours, mist or dust. Use adequate ventilation. Decomposition products can be highly toxic and irritating. Individuals with lung or breathing problems or prior allergic reactions to isocyanates must not be exposed to

# PRODUCT: PF7770 PLIOGRIP URETHANE STRUCTURAL ADHESIVE PART A (35 MIN)

# **SECTION 07: HANDLING AND STORAGE**

Precautions for safe handling.....

practices. Warning properties (irritation of the eyes, nose and throat or odour) are not adequate to prevent chronic overexposure from inhalation. Wash thoroughly after handling. Wear respiratory protection if material is heated, sprayed, used in confined space, or if exposure limit is exceeded. Employee education and training are important.

Conditions for safe storage, including any incompatibilities

exposure limit is exceeded. Employee education and training are important.

Store in tightly closed containers to prevent moisture contamination. Store in a cool, dry and well ventilated area. Exposure to vapours of heated isocyanates can be extremely dangerous.

# **SECTION 10: STABILITY AND REACTIVITY**

Chemical stability..... Reactivity ..... Conditions to avoid, including static ....... discharge, shock or vibration Hazardous decomposition products.....

Possibility of hazardous reactions.....

Stable at normal temperatures and pressures.

Contact with moisture and other materials will react with isocyanates.

Acids, alcohols, aluminum, amines, ammonia, bases, copper alloys, fluorides, iron, isocyanates, oxidizers, phosphorus compounds, strong alkalis, water, zinc.

See hazardous combustion products section 5.

Contact with moisture, other materials that react with isocyanates, or temperatures above 177C, may cause polymerization.

#### **SECTION 11: TOXICOLOGICAL INFORMATION**

**INGREDIENTS** LC50 LD50 Benzene, 1,1'-methylenebis[4-isocyanato- (MDI) 490 mg/m3 4 hr 0.369 mg/L 4 hr 9,200 mg/kg rat oral >7,900 mg/kg rabbit dermal Talc Not available Not available 2,4-Diphenylmethane diidocyante (MDI) No data No data chest discomfort, difficulty breathing and reduced pulmonary functioning. Persons with pre-existing, nonspecific bronchial hyperractivity can respond to concentrations below the TLV with similar symptoms as well as asthma attack. These symptoms can be delayed up to several hours after exposure. Effects are usually reversible. INGESTION: May cause irritation. Symptoms can include sore throat, abdominal pain, nausea, vomiting and diarrhea. Talc can be absorbed into the lungs and the digestive tract, and adversely affect lung function. Effects of chronic exposure..... The main effect of repeated exposure to diphenylmethane-4,4'-diisocyanate (MDI) is respiratory sensitization causing asthma. . As a result of previous repeated overexposure or a single large dose, certain individuals develop sensitization, which will cause them to react to a later exposure to product at levels well below the TLV. Symptoms, including chest tightness, wheezing, cough, shortness of breath or asthma attack, could be immediate or delayed. There are reports that once sensitized, an individual can experience these symptoms upon exposure to dust, cold air or other irritants. This increased lung sensitivity can persist for weeks and, in severe cases, for several years. Prolonged or repeated exposure may cause lung damage, including a decrease in lung function. Possible risk of irreversible effects. Prolonged skin contact may cause reddening, swelling, rash, blistering, and in some cases, skin sensitization. Sensitization can be permanent. Prolonged vapour contact with eyes may cause conjunctivitis. Talc has been shown to cause fibrosis of the lungs. Isocyanates are known to cause skin and respiratory sensitization in humans. Animal tests Sensitizing capability of material..... have indicated that respiratory sensitization can result from skin contact with diisocyanates. 4,4'-Methylenediphenyl diisocyanate is listed by IARC as a Group 3 carcinogen. This product contains non-asbestiform Talc, which is classified as a Group 3 (not classifiable as Carcinogenicity of material..... to carcinogenicity to humans) by IARC Reproductive effects..... No data on reproductive effects were found in the literature sources consulted. MDI: It crosses the placenta in animals. Mutagenicity..... The data do not allow for an adequate assessment of the mutagenic effect. This product is an inert plastic when fully cured, and as such, is non-hazardous. Exposure Note..... to unreacted chemicals can occur when handling the individual components in pails or when using cartridges from the time of dispensing until the mixed material has cured. The mixed material is actually curing as it is dispensed in an increasingly viscous form, making it unlikely to present an inhalation hazard. The semi-viscous mixture does not flow like a liquid when dispensed thus minimizing the president and the present an

### **SECTION 12: ECOLOGICAL INFORMATION**

Environmental..... Do not allow to enter waters, waste water or soil. Persistence and degradability..... Not available.

liquid when dispensed, thus minimizing the possibility of accidential skin contact.

# PRODUCT: PF7770 PLIOGRIP URETHANE STRUCTURAL ADHESIVE PART A (35 MIN)

# **SECTION 13: DISPOSAL CONSIDERATIONS**

Information on safe handling for disposal. and methods of disposal, including any contaminated packaging

Dispose of waste in accordance with all applicable federal, provincial/State and local regulations. Industrial incineration is the preferred method. Empty containers retain product residue; observe all precautions for the product. Decontaminate containers prior to disposal. Empty decontaminated containers should be crushed to prevent reuse. Do not heat or cut empty containers with electric or gas torch as vapours and gases may be toxic.

# **SECTION 14: TRANSPORT INFORMATION**

TDG Classification	Not regulated.
